Stakeholder Analysis Matrix

Student: Sourabh Shelke | Roll No: 23102C0029 | Class: BE CMPN (Computer Engineering)

1. Stakeholder Classification & Expectations

Stakeholder Group	Key Responsibilities	Primary Value Expected	Impact
Policyholders	Submit genuine claims & policy proofs.	Fast verification; rapid payouts.	High
Underwriters	Validate records, review notes, progress status.	Automated pre-screening & risk scores.	High
Fraud Officers (SIU)	Investigate high-risk anomalies (≥ 70%).	Instant alert triggers & audit trails.	High
TPAs & Hospitals	Issue bills, discharge summaries, reports.	Direct integration & fast turnaround.	Med
Insurance Regulators	Establish compliance rules & SLAs.	Data privacy & immutable audit logs.	High
DevOps Engineers	Manage CI/CD pipelines & containers.	Idempotent deploys & zero downtime.	High

2. Governance & Communication Channels

- **Real-Time Alerts:** Automated visual banners alerting underwriter leads within 2 seconds of high-risk detection.
- **Underwriter Audit Records:** Every status transition logs reviewer identity, timestamp, and notes.
- **DevOps Telemetry:** Automated Jenkins build consoles and Docker container health endpoints.
