Local Development Setup Guide

Student: Sourabh Shelke | Roll No: 23102C0029 | Class: BE CMPN (Computer Engineering)

1. Prerequisites & Toolchains

Ensure Java JDK 17, 21, or 23, Apache Maven 3.8+, and Docker Desktop are installed on the local workstation.

2. Build and Execution Steps

Clone Repository:
git clone https://github.com/sourabhshelke/insurance-document-verification-portal.git

Compile & Run Application:
mvn clean spring-boot:run

Access Interactive Endpoints:
• Portal UI: http://localhost:8085
• Health Check: http://localhost:8085/api/health
• H2 Database Console: http://localhost:8085/h2-console

Execute Automated Tests:
mvn test
