Software Requirements Specification (SRS) Summary

Student: Sourabh Shelke | Roll No: 23102C0029 | Class: BE CMPN (Computer Engineering)

1. Functional Requirements (FR)

- **FR-01 (Intake):** Ingest document metadata and generate formatted unique IDs (DOC-2026-XXXX).
- **FR-02 (Search):** Provide real-time keystroke search and multi-status filtering toolbar.
- **FR-03 (Summary KPIs):** Calculate live metrics for Total, Verified, Under Review, and Flagged counts.
- **FR-04 (Fraud Engine):** Automatically quarantine records with risk score ≥ 70% as FLAGGED_FRAUD.
- **FR-05 (Underwriting):** Enable underwriter inspection, status transition, and audit notes logging.

2. Non-Functional Requirements (NFR)

- **NFR-01 (Performance):** Sub-second REST response times and UI load time under 1.5 seconds.
- **NFR-02 (Portability):** Packaged in self-contained Alpine JRE Docker container on port 8085.
- **NFR-03 (Reliability):** Liveness/readiness health probes reporting application status.
- **NFR-04 (Quality):** Automated test suite covering 6 critical user journeys with 100% pass rate.
